FOR EVERY NEED.

New skills. No spills.

Yoo-hoo – we are learning to drink! Independent drinking is one of the most important steps in any baby's development – and quite difficult too. The little ones will need a lot of patience and skill. We would like to help you in this learning process and have developed the NUK Evolution Cups: learn-to-drink cups that “grow” with your child; in two sizes and with different drinking tops.

LEARNING TO DRINK MOVING ALLOWED.

Slurp. Swallow. Hooray!

Children love to show everyone how grown-up they already are. The NUK Motion Cup, specially designed for straw beginners, ensures quick drinking success. Little ones and their parents are given an easy and fun start to drinking with a straw. Our trick: the innovative motion drinking system means the straw moves with the cup.

So it always stays in the liquid.

Even if your baby tips up the NUK Motion Cup like a conventional cup. A sense of achievement for young and old!

THE SPECIAL CUPS FOR THE DAY ...

This is fun!

There is now something that makes drinking even more fun! The new NUK Cups with Chameleon Effect excite children because the motif on the cup changes when warmed or cooled. You can hardly believe it! Your little ones won't want to let it out of their hands.

Of course, the NUK Cups with Chameleon Effect are spill-proof as well and come with many more practical features.

... AND FOR THE NIGHT.

Shhh ... Let mummy and daddy sleep ...

Isn't it a great success, when your baby learns to drink independently? Especially at night! Thank to the new NUK Cups with Glow-in-the-Dark Effect, this next step in growing up has just become a whole lot easier. For your little one and for you! The glowing elements make finding the cup very easy. Without waking up mummy and daddy. As with every NUK Cup, the NUK Cups with Glow-in-the-Dark Effect are also spill-proof and come in many adorable colours with cute motifs.
